

Key Investor Information Document

This document represents the key investor information on Raiffeisen Sustainable Solid Fund and does not constitute marketing information. The information is required by Law to help you understand the nature and the risks associated with investing in this fund. You are advised to read it, in order to be informed before making the decision whether to invest or not in this fund.

RAIFFEISEN SUSTAINABLE SOLID FUND (herein referred as Feeder Fund) is an Open ended Collective Investment Undertaking with public offer in transferable securities, created as a feeder fund by Raiffeisen Invest – Managing Company of Pension Funds and Collective Investment Undertakings sh.a

Master Fund is named Raiffeisen-Nachhaltigkeit-Solide and it is managed by Raiffeisen Kapitalanlage-Gesellschaft m.b.H., with business address in Mooslackengasse 12, A-1190 Vienna, Austria.

The units of Feeder fund are not secured from the deposit insurance scheme; investment in Raiffeisen Sustainable Solid Fund is not guaranteed; the Fund does not rely on any other outside entities to secure liquidity and stability of net asset value, and the potential risk of losing the principal investment lies with the investor.

Investment Objective and Policy*

The investment goal of the Feeder fund is to enable investors to participate in the realization of the return of the Master Fund, which aims to create regular income in the medium term.

Feeder Fund invests at least 85% of its assets in the units of Master Fund Raiffeisen-Nachhaltigkeit-Solide and not more than 15% of its assets in instruments such as short-term bank deposits, repo transactions, cash and its equivalents.

Master Fund is a mixed fund whose investment goal is regular income. The investment fund invests a total of at least 85% of the fund assets in investments that are used to fulfill environmental and/or social characteristics and/or sustainable investment objectives of the investment fund. At least 55% of the funds are invested in (non Taxonomy-aligned) sustainable investments with environmental and social objectives. The master fund's investments in equities and equity-equivalent securities are limited to 30 % of the fund assets. At least 51% of the Master Fund's assets are invested directly in securities. Issuers of bonds or money market instruments in the Fund may be, among others, sovereigns, supranational organizations and/or companies. The Master Fund may invest more than 35% of its assets in debt securities issued by the governments of Austria, Germany, Belgium, Finland, France or the Netherlands. The Master Fund is actively managed without reference to any benchmark. The Master Fund may invest in derivative instruments as part of its investment strategy, with the aim of mitigating risks and achieving the objectives of the investment policy.

Feeder Fund revenues are not distributed but are instead re-invested in the Fund. The Feeder fund is denominated in Euro. Investments and redemptions are made in Euro. The sale of Feeder Fund Units can be done at any time upon investor request. The redemption is made within the legal deadline of 7 days from the day of receipt of a valid request for sale. The performance of the Feeder Fund will depend significantly on the performance of the Master fund, which can fluctuate depending on market conditions. Transaction costs do not have a material impact on the performance of the fund.

Recommendation: Raiffeisen Sustainable Solid Fund may not be suitable for investors who intend to withdraw from the fund within 5 years. Given the highly volatile nature of investments such as equities, this horizon would increase the opportunity for an optimal return on investment. The Feeder fund should not be used as a current account, but rather as a medium- and long-term investment with the purpose of securing a satisfactory return and asset diversification. A very short-time horizon can result in an unsatisfactory rate of return.

**For additional information on Fund objectives and investment policy please refer to Raiffeisen Sustainable Solid Fund prospectus.*

Investor Risk Return Profile

Low Risk

High Risk

Typically High Return

Typically Low Return

1	2	3	4	5	6	7
---	---	---	---	---	---	---

- The synthetic risk return indicator (SRRI) aims to offer the investor an overview of the fluctuations in Fund unit price based on historical performance. Synthetic risk return Indicator corresponds to one integer which is used to rank the fund risk profile from level 1 to 7, based on the level of volatility.
- Historical data used to generate the indicator cannot constitute full guarantee on the future risk profile.

- The category of risk return indicator is not guaranteed that it will remain unchanged, and the risk category may change over time.
- The expected risk profile of the Feeder Fund is closely linked to the risk profile of the Master Fund.
- Based on the historical data of the Master fund returns during the last 5 years, the projected risk profile of the Feeder fund belongs to category 3 of the synthetic risk and return indicator (SRRI = 3).

Material risks which are not fully accounted for in the synthetic risk return indicator:

Credit risk: this risk is related to the possibility that the issuer of a financial instrument, part of the Master Fund's assets, may not be able to partially or fully repay all its obligations, which would have a negative impact on the value of the Feeder Fund's assets.

Liquidity risk: represents the risk that the Feeder Fund will be unable to sell the units of the Master Fund due to the suspension of the activity by the latter.

Counterparty risk: the risk that a payment in a transfer system is not settled or is subject to delay. This risk is also related to the probability that the counterparty is unable to fulfill its obligations in accordance with the conditions of an agreement or predetermined transaction..

Operational risk: the risk of losses of the Fund caused by human or system errors within the management company, by the existence of inadequate internal processes, by legal or documentation errors, as well as by marketing, evaluation and payment procedures on behalf of the Fund.

Derivative Risk: The Master Fund may use derivative instruments as part of its investment strategy. This increases the risk of fluctuations in the value of the master Fund and consequently also of the Feeder Fund.

Commissions and fees

Commissions and fees are used to be paid for the management of Raiffeisen Sustainable Solid Fund, including the marketing and distribution costs of the fund. These commissions and fees reduce the potential return on your investment.

One-time commissions / fees before or after investment	
Subscription Commission/Fee	0.00%
Exit Commission/Fee	1.00% of the value of redeemed units before the completion of the 2-year period from investing in the fund
Ongoing Fees for year 2025	1.58%
The figure for ongoing fees is based on the expenses for the year ended 31.12.2025. The ongoing fee includes the management fee, which is up to 1.30%, and any fees imposed during the previous year. This figure may vary from year to year. The ongoing fees paid by the fund assets may in no case exceed 3.50% per annum of the net asset value of the fund. Transaction costs are calculated according to the working conditions of the intermediary parties and are not included in the calculation of commissions and ongoing fees, but they are charged to the Fund. Please refer to the item "Expenditure" of the fund's annual report for further details regarding the ongoing fee components. For more information about costs / fees, please refer to section 3.15 of the Fund prospectus published on the official website of the Management Company: www.raiffeisen-invest.at	
Special Commissions / Fees	
Performance Fee	Not applicable

Presentation of Past Performance

Past performance serves only for informative purposes and does not constitute a promise or guarantee for future performance. The performance showed here represents the net return to the fund, upon having deducted the annual ongoing fee. The fund started its activity on 07 May 2024. The past performance is calculated in Euro.
